SUMMARY

AI & Product Builder experienced in launching products, building AI-powered systems, and developing automation workflows. Background in full-stack development and cybersecurity, with a focus on turning ideas into scalable, real-world solutions.

WORK EXPERIENCE

Al Enabler 08/2026 – Present
Confidential Riyaid
Developing AI-powered products, applications, and websites while integrating AI tools, automating workflows, and improving team productivity through AI adoption and training.

(EIR) – AI & Product 2026 – Present
Aya Riyaid
- Built 3 internal AI-powered operational systems for supplier management, factory issue tracking, and returns workflows, reducing problem-resolution time from 6–8 hours to under 30 minutes (~95% reduction).
- Led the creation and launch of a perfume brand from 0→1, managing product development, branding, e-commerce, and marketing execution.

Co-Founder and CEO 2025 – Present
Husn
- Built a dual-platform cybersecurity product combining AI-powered threat detection (B2B)
- Developed local AI workflows for vulnerability analysis and real-time monitoring, reducing manual security analysis time by over 70%.

AI Engineer 2026 – 06/2026
PEAKS Team Riyadh
- Built an internal analytics system that unified performance data across all platforms, reducing manual reporting and monitoring time by over 80%.
- Developed AI-assisted content and automation systems that streamlined internal workflows and improved team productivity.

SKILLS

AI Engineering
- LLM Applications
- AI Automation Workflows
- Prompt Engineering

Cybersecurity
- Penetration Testing
- Vulnerability Assessment
- Bug Hunting

Full-Stack Development
- React
- TypeScript
- Flask
- Next.js

Product Management
- Product Strategy
- Market Validation
- Go-to-Market
- Product Launches

CERTIFICATIONS

CRTA
Red Team / Active Directory (2025)

eWPT
Web Application Penetration Testing (2024)

Google Project Management
Project Management Foundations (2023)

eJPT
Junior Penetration Testing (2022)

CS50
Harvard Computer Science (2021)

AWARDS

3rd Place — Amad Hackathon 18/07/2026
Tuwaiq Academy and Alinma Bank
An AI-powered platform that teaches investing through interactive lessons, gamification, and virtual stock trading.

3rd Place — Defensethon 2026 05/05/2026
Tuwaiq Academy and the Ministry of Defense
- Built Manee, a cybersecurity system that detects and blocks threats.

6th Place Nation— Bug Bounty Junior 03/12/2025
Black Hat MEA25
- Identified 25+ vulnerabilities in under 8 hours

3rd Place - HackHubCTF By KSU 20/02/2025
King Saud Universty
- Achieved 3rd place in the HHC CTF competition solving advanced cybersecurity and exploitation challenges

1st Place — CoderHub Competition 13/02/2025
LEAP 2025
- Achieved first place during #LEAP25 activities
